AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claim 1 (currently amended): A plugboard for housing sockets and micro-relays, of the type ~~used for housing~~ having a plurality of connectors, allowing connection of a plurality sockets or micro-relays, composed of a base (1) ~~and having~~ a plurality of holes (4) for housing connectors, sockets or micro-relays (2), each of said plurality of connectors (2) having a pair of connector pins (3), characterized in that said holes (4) are not aligned with each other and with the position of alternating holes for introducing the connector, socket or micro-relay rotated 180° with regard to the position of the remaining adjacent holes intended for housing the said connectors (2), sockets or micro-relays of the ends of the in said plugboard thereby allowing for all connector pins (3) to open and secure said plurality of connectors (2) within said corresponding plurality of holes (4).

Claim 2 (currently amended): A plugboard for housing sockets and micro-relays according to claim 1, characterized in that it is said base (1) is provided with three holes (4) for housing three connectors (2) suitable for mounting, sockets or micro-relays, wherein the central hole (4) intended for housing a connector, socket or micro-relay is not aligned 180° with regard to the two remaining holes (2) intended for housing the said connectors (2), sockets or micro-relays of the ends of the plugboard and with the position for introducing the connector, socket or micro-relay rotated 180° with regard to the position of the two holes intended for housing the connectors, sockets or micro-relays of the ends of the plugboard.

Claim 3 (currently amended): A plugboard for housing sockets and micro-relays according to claims 1 ~~and 2~~, characterized in that in each one of the holes of the plugboard, all the pins (3) of the connectors, sockets, or micro-relays (2) can open,

ensuring the connection between plugboard and connectors, sockets or micro-relays introduced in said holes.

Claim 4 (new): A plugboard for housing sockets and micro-relays according to claim 2, characterized in that in each one of the holes of the plugboard, all the pins (3) of the connectors, sockets, or micro-relays (2) can open, ensuring the connection between plugboard and connectors, sockets or micro-relays introduced in said holes.
